

## **CS336 - PROJECT - GROUP 8**

### **Admin credentials:**

UserID: 12121

Password: king

### **Customer Representative credentials:**

UserID: 22222

Password: lucky

### **User credentials:**

- 1) UserID: 12345  
Password: cake
- 2) UserID: 12334  
Password: apple
- 3) UserID: 99999  
Password: berry
- 4) UserID: 91245  
Password: pastry

The password for SQL workbench has to be changed in the ApplicationDB file to the local password of the grader (this will allow it to run locally on the graders machine).

**\*NOTE\*** Please make sure path to servlet-api.jar is correct under properties before running the project

| <b><u>Work</u></b>     | <b><u>Contribution</u></b>     |
|------------------------|--------------------------------|
| ER Diagram             | Amogh, Katie, Hyeseo(Michelle) |
| Relational Schema      | Amogh                          |
| SQL File (8schema)     | Amogh                          |

| ViewItems.jsp                  | Amogh |

my team did not really contribute so much to this project. So I (Amogh Sarangdhar) had to do **almost everything on my own**. From doing the ER diagram to SQL file to coding the project to making the demonstration video, I had to do 80% of the work. My teammates did not even reply to me in the group chat nor did they take any efforts to get the work done. Everyone seemed as if they **did not care** at all about the project. Really poor project experience

**Hyeseo Lee (Michelle)** = **HAD ZERO** contribution to this entire project. She only attended a call for the ER diagram, other than that she did **ZERO** work. If you ask her anything about the project she will have **NO** idea about it. Does not even know how to setup the project even after helping her many times.

**Katherine Sidebotham** = She did 4-5 coding files, but other than that nothing much work was done.

**Kevin Arbito** = He also did 4-5 coding files, and helped me with fixing bugs and errors. He did make some contribution in helping me with this project.

**Amogh Sarangdhar** = did majority of the stuff
